***Election/Restrictions***

This application contains claim groups directed to the following patentably distinct species of the claimed invention:

**Group**

- I. Claims 1-2, drawn to SPICE and SOI MOSFET with zero body current, macro parameters, and a calculation that finds the steady state during circuit operation are omitted.
- II. Claims 3-4, drawn to SPICE and SOI MOSFET with input signal cycles, cycle of trial Pulses, load capacitance, zero fluctuation, total body charge, extrapolating, a steady state During circuit operation of a partially depleted SOI MOSFET is found.
- III. Claim 5, drawn to SPICE and SOI MOSFET with values with first and second magnitudes, nodes, first magnitude lower than second magnitude, utilizing the values as error tolerance parameters used as a convergence criterion
- IV. Claim 6, drawn to SPICE and SOI MOSFET with body terminal, body potential, drain current, known/effective channel width, steady state of a floating body, direct measurement and interpolation/extrapolation, body potential tabularizing.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2825

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is advised that cancellation of non-elected claims is required.
